SUMMARY

Product-minded full-stack developer shipping production apps and identifying user needs. Proficient in AI-powered prototyping (Claude, Cursor, Gemini) to validate ideas before engineering handoff. SQL fluency, Agile familiarity, cross-functional execution — backed by multiple national hackathon wins. Comfortable working 0-to-1 in fast-moving startups with high ownership.

EDUCATION

Indian Institute of Information Technology, Nagpur

B.Tech – Computer Science (Data Science & Analytics) — CGPA: 8.00

Nagpur, India

Aug 2023 – Jun 2027

City Montessori Inter College

Lucknow, India

Class 12 — 95.25%

Jun 2021 – Aug 2022

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C/C++, Java, Python, SQL

Frontend: React, Next.js, HTML5, Tailwind CSS, GSAP, Three.js, React-Native

Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, MySQL, FastAPI, Docker, Redis

PM & Design: Jira (Sprints, Backlog, Story Pointing), Figma (Wireframing, PRDs), Miro (User Journeys), Notion

AI & Prototyping: Claude, Cursor, Gemini — rapid idea-to-prototype; AI automation & no-code tooling

Analytics & Testing: Google Analytics, Firebase, A/B Testing, Funnel Analysis, Jest, Postman

EXPERIENCE

Mahabal Agro Industry (Freelance) [Link](#)

Product & Tech Lead — React, Vite, Tailwind CSS, GSAP, Figma, Vercel

- **Identified multilingual usability gap** for non-English-speaking farmers; wrote product spec, scoped requirements, and shipped a responsive multilingual SPA — owning full product lifecycle from user research and Figma wireframes to production deployment.
- **Tracked post-launch performance** via Google Analytics and Search Console; used traffic and retention data to prioritize improvements — achieving 95+ PageSpeed score through AVIF compression and asset optimization.
- **Built reusable component library** with GSAP/Lenis animations; integrated Web3Forms for serverless lead capture — improving conversion funnel for client inquiries.

PROJECTS

Real-Time Multiplayer Chess [Link](#)

Node.js, Express.js, Socket.IO, EJS, Chess.js

- **Defined core product requirement** (sub-100ms board sync) and wrote feature spec before implementation. Engineered Socket.IO event-driven architecture reducing synchronization latency by **30%** via optimized Chess.js validation logic.
- **Built concurrent session engine** managing matchmaking and live game state across simultaneous users — collected user feedback post-launch and iterated on matchmaking UX to reduce drop-off in lobby wait times.

E-Commerce Platform (MERN + Payments) [Link](#)

MongoDB, Express.js, React, Node.js, Razorpay/Stripe, JWT, Tailwind CSS, SQL

- **Prioritized checkout reliability as #1 product metric**; ran A/B tests and used SQL queries against transaction logs to identify drop-off — integrated Razorpay + Stripe achieving **98% payment success rate** and **25% faster checkout** across mobile and desktop.
- **Shipped JWT auth, debounced search, lazy loading, and API rate limiting** — balancing user experience with backend performance constraints; documented trade-offs in a lightweight PRD shared with reviewers.

ACHIEVEMENTS

- **Codecraft Hackathon – NIT Trichy '24:** 1st place among national participants — defined product scope, built and pitched a working solution in under 24 hours.
- **TantraFiesta – IIIT Nagpur '25:** 1st place in both **Designathon** and **Genathon** hackathons. [\[Link\]](#)
- **Web Dev Hackathon – IIIT Nagpur '25:** 2nd place in Website Development. [\[Link\]](#)
- **Web Dev Lead – TantraFiesta '25:** Managed 4-person team; delivered official fest website end-to-end serving **1,000+ users** — coordinated design, engineering, and deployment milestones.
- **Web Dev Member – E-Summit '25:** Launched official college summit site end-to-end alongside a team of 3.
- **LeetCode:** Solved **450+** problems — Contest Rating: **1528**.
